What is Teach the Teacher?

Designed by students, Teach the Teacher is a student-led professional learning program for educators, where everyone has a voice.

Teach the Teacher provides a space for students, teachers and school leadership to connect, explore and share ideas in a constructive and judgement free environment.

The program is a whole school student-led framework to encourage and enable student voice, agency and participation. Students are supported to drive change at school through multiple workshops from VicSRC. In their own professional learning session, students lead collaborative conversations with school staff informed by data collected from their peers.

Teach the Teacher supports the development of stronger and more effective student-teacher relationships and harnesses student knowledge and perspectives to shape and improve teaching and learning.
